

## House of DualSun

There is a house in Chateau Gombert  
They call it DualSun  
It's been the house of many smart engineers  
And god I know I'm one!

PV panels make electricity  
But most of the rays turns to waste  
With DualSun, you have hot water and more electricity  
And that's just to give you a taste

8 years, 5 patents and 6000 panels  
And they all are Made in France  
We heat homes, we heat pools, we heat all types of buildings  
It's time for pastis and a dance.

We are a band of solar geeks  
We see two when we look at the sun  
We get serious about pressure and flow rates  
But we also know how to have fun

There is a house in Chateau Gombert  
They call it DualSun  
It's been the house of many smart engineers  
And god I know I'm one!
